Start AI *Within 24 Hours*

Five workflows. One day. From zero account to AI you actually use Monday morning.

THE PROMISE

By the end of 24 hours you will have five working AI workflows running on whatever LLM you already have a tab open on. No course. No course-correction. No tab-shopping for the "right" tool.

A NOTE BEFORE YOU START

This is the guide I wish I had *two years ago.*

FROM BOUBACAR

Skip the AI course funnel. Skip the "best 50 AI tools" listicle. Skip the cohort program that starts in three weeks. By tomorrow this time, you'll have five workflows running. That's the whole product.

Contents

01 The 24-hour schedule p. 3

02 Workflow 1 — Email triage p. 4

03 Workflow 2 — Meeting prep p. 5

04 Workflow 3 — Document compression p. 6

05 Workflow 4 — Decision support p. 7

06 Workflow 5 — Personal ops p. 8

07 The Monday-morning worksheet p. 9

08 FAQ & next step p. 10

Block it on your calendar. *One day, real moves.*

Below is the timing structure that works if you start tonight at 8pm. Adjust to your actual schedule. The only rule: don't spread it across a week.

8:00 PM TODAY	**Setup (15 min)**	Pick the LLM you already pay for (Claude, ChatGPT, Gemini, Grok, Perplexity, any of them). One tab. No tool-shopping.
8:15 PM	**Workflow 1**	Email triage. Paste your inbox snapshot. Output: 3 categories + draft replies.
9:30 PM	**Workflow 2**	Meeting prep on tomorrow's calendar. Output: agenda + open questions per meeting.
10:30 PM	**SLEEP**	No, really. Save 3 for morning. Burning out at midnight = no Monday-morning ship.
6:30 AM	**Workflow 3**	Document compression. Paste a long doc you've been avoiding. Output: 1-page brief.
7:30 AM	**Workflow 4**	Decision support. Stress-test 1 real call you're stuck on. Output: 3 reframes.
8:30 AM	**Workflow 5**	Personal ops. One household / family / errand process you keep forgetting. Output: a written runbook.
9:00 AM	**SHIP**	Use Workflow 1 on today's actual inbox. Live, not practice.

Stop reading every email. *Triage in 4 minutes.*

STEP 1 OF 3

Snapshot your inbox

Outcome: a paste-ready list of 30-50 unread subject lines + senders.

Open your email client. Copy the subject + sender for the last 30-50 unread messages. Paste them into a scratch doc.

STEP 2 OF 3

Paste this prompt into any LLM

Outcome: three buckets with draft replies for the action-needed bucket.

PASTE INTO ANY LLM

```
You are my email triage assistant. Take the inbox list below and split it
into 3 buckets:

  1. ACTION NEEDED (under 5 min reply, do today)
  2. READ LATER (informational, no action)
  3. ARCHIVE / DELETE (newsletters, junk, FYIs already handled elsewhere)

For each ACTION NEEDED item, draft a 2-3 sentence reply I can edit and
send.

Inbox:
[paste your 30-50 lines here]
```

STEP 3 OF 3

Send the action-needed batch

Outcome: 5-12 emails closed in 30 minutes instead of two hours of inbox grazing.

Copy each draft reply into the actual reply box. Edit one line for your voice. Send. Move to the next.

> *The LLM is not your replacement. It is your first draft. The draft is 80% of the work.*

07 · MONDAY-MORNING WORKSHEET

Fill this in before *9:00 AM Monday.*

Print this page. Or open it on a tablet. The point: write your answers in your own hand or your own typing. The act of writing locks in the decision.

1. Which one workflow am I committing to using on Monday morning?

Pick exactly one. Not five. The other four are next week.

2. What is the calendar block I'm putting on Monday?

Specific time. Specific duration. e.g., "Mon 8:15-8:45 AM, Email triage."

3. What would I have to believe for this to fail by Friday?

Pre-mortem. Naming the failure mode is how you avoid it.

4. Who am I telling that I did this?

One person. Spouse, friend, classmate. Public commitment = follow-through.

08 · FAQ

The four questions everyone asks

"Which LLM should I use?"

The one you already pay for. If you don't pay for one yet, ChatGPT or Claude. The workflows work on all of them. The brand doesn't matter for 95% of what most people do.

"Will this work if I'm not technical?"

Yes. You're copy-pasting a prompt and pasting in text. If you can use Gmail, you can do this.

"Do you offer refunds?"

No. Digital download. If you don't think it's worth $27, don't buy it. If you bought it, the value is in doing the 24 hours, not in returning the file.

"What's next after these 5 workflows?"

The $79 Paste Pack adds 25 more prompt bundles across the same 5 categories. Same one-paste-and-go format. See the back cover.

NEXT STEP

Ready for 25 more?

The Paste Pack, $79, adds 25 production-tested prompt bundles. Same five categories, deeper plays.
